Profile Summary

Innovative and detail-oriented Full Stack Developer with a strong foundation in mathematics and computer science. Proficient in modern web development frameworks and backend integrations, with hands-on experience in machine learning and data analysis. Demonstrated ability to collaborate effectively in team settings and deliver user-centric solutions. [GitHub](#)

Technical Skills

- **Web Development:** Svelte, SvelteKit, React; Backend integration with Supabase, PocketBase, Firebase
 - **Programming Languages:** Python, Go, C++, JavaScript, SQL
 - **Data Science & ML:** NumPy, PyTorch, Data Analysis, Machine Learning Frameworks
 - **Tools & Practices:** Git, Agile Methodologies, Algorithm Design, LaTeX
-

Projects

- **ParrotPB**
A blogging platform built with SvelteKit and PocketBase, enabling seamless content creation and management.
 [GitHub Repository](#)
- **ClientPB**
Frontend client for interacting with PocketBase backend services, facilitating efficient data handling.
 [GitHub Repository](#)

- **NumPy Basics for Beginners**

A comprehensive Kaggle notebook introducing fundamental NumPy operations for data analysis.

 [Kaggle NotebookKaggle](#)

- **Flask Scraping App**

A web application utilizing Flask for scraping and presenting data from various sources.

 [GitHub Repository](#)

Education

Bachelor of Science in Mathematics and Computer Science

Machakos University, Machakos County, Kenya

Expected Graduation: October 2025

Relevant Coursework: Algorithms, Data Structures, Machine Learning, Discrete Mathematics, Database Systems, Calculus, Linear Algebra, Software Engineering.

Soft Skills

- Team Collaboration
 - Critical Thinking
 - Attention to Detail [Elimu Centre](#)
-

Additional Information

- **Blog:** Sharing insights and tutorials on web development and data science.

 [Personal BlogGitHub](#)

- **Kaggle Profile:** Engaged in data science projects and competitions.
